PROJECTS

Compiler & Semantic Analysis Project | C++

- Developed a recursive descent parser and semantic analyzer for a custom programming language, using C++
- Implemented symbol table management, static scope resolution, and type checking to enforce language semantics
- Built Compiler diagnostics to detect undeclared variables, type mismatches, unused variables, and uninitialized variable usage

Personal Portfolio Website | HTML, CSS, JavaScript, BootStrap

- Designed and developed a responsive personal portfolio website using HTML, CSS, and JavaScript and Bootstrap.
- Built a modern user interface featuring responsive layouts, interactive navigation, and custom styling.
- Deployed and maintained the website using GitHub Pages with Git for version control and continuous updates.

EXPERIENCE

Bay Host | Topgolf

January 2026 - Present

- Deliver exceptional customer service while managing multiple guest groups in a fast-paced, high-volume environment.
- Train and mentor new team members on company procedures, service standards, and guest experience expectations.
